## Experiment, Adjust, Repeat

### Test your tech

Your audience is likely surrounded by a lot of distractions as they attend your virtual presentation: don't let the technology side of your presentation be your downfall. Set yourself up for success well ahead of time and test your technology!

A dry run is essential so that you're comfortable with the platform features. **Make sure you have the proper equipment** and **practice with the same technical set up** (computer, headset and internet connection) that you will use when you deliver the presentation.

## It's all about Content & Connection

### Engage your attendees

**Variety** is key to engagement, feel free to use different means to entertain your audience:

- a short **video** or audio clip ? Use **Youtube** & make sure to test the audio and video quality beforehand!
- encourage **questions** from the beginning and **use public chat** to engage with your audience. Have someone monitor it to ensure you are not missing any important comments!
- be **active** : move your avatar using the emotes!

### Make sure your slides are attractive

Your slides are not your presentation but are still essential in highlighting your speech. **To keep your information clear, concise and visually appealing**, try to simplify your data point, use compelling imagery, and avoid overloading text

## Anticipation is key : Prep a plan B

### Send your slides & backup video in advance

Even tested, technology can fail... your participation being online it would be safer to **record a backup video of your presentation**. Although the chances are very small, it would allow your event host to broadcast your presentation in the case of an unfortunate turn of events due to a technical issue. In the same vein, **send your slides to your co-host or event moderators in advance** to ensure there will be no issue uploading it.

## Best Practices

### Speakers' tools

#### Presentation boards

To use a presentation board, simply click on it. A URL bar will appear in the bottom right corner of your screen to show you it is active. **Use this bar like a regular browser to navigate the web.**

#### Upload documents

For best viewing, make sure your document fit the screen size.

#### Share your screen

If you use multiple monitors, make sure you are sharing the proper screen!

#### Share your camera

Increase your attendees engagement by turning your camera on: but make sure to make eye contact with your camera!

#### Presenter tool

You can face your public and have your slides in front of you using the presenter tool!

#### Emotes

To interact with your audience through your avatar, use your keyboard shortcuts or type the corresponding word in the chat box! **For more avatar commands, type /help in the public chat.**

**/WAVE**

**/CHEER**

**/CLAP**

**/THINKING**

**/CONFUSED**

**/SAMBA**

### Speakers' essentials

For the best possible experience in our virtual world, here is the essential equipment you need:

A compatible PC or Mac

Earphones or a headset with microphone

Stable internet connection
